Dear Parents

### **Measles, chicken pox and shingles**

Could we please ask for your cooperation in an important matter?

One of our students is receiving medical treatment which puts them at risk if they are exposed to measles, chicken pox or shingles.

The best way to protect our student from measles is for all children at school to be immunised against measles. Please would you discuss measles immunisation with your GP, if your child has not yet received it? If your child is suspected of having measles, you should keep your child at home and let us know immediately.

Our student is also at risk from chicken pox and would need to be given an injection within three days of contact. If your child is suspected of having chicken pox please let us know immediately.

It is also important that you let us know if there is shingles in your household.

Your child is not at any risk whatsoever from this situation. However, the health and well-being of our student who is at risk, does depend on the co-operation of all other parents and we trust you will support us in this.

Many thanks for you cooperation with this matter.

Yours sincerely

**Ranjit Berdesha**
